Cartridge, Caliber .50, Ball, Plastic Practice, M858 .......................................... 9-35
Cartridge, Caliber .50, Tracer, Plastic Practice, M860 ....................................... 9-37
### CHAPTER 9. CALIBER .50 CARTRIDGES - Continued

- Cartridge, Caliber .50, Saboted Light Armor Penetrator (SLAP), M903: 9-39
- Cartridge, Caliber .50, Saboted Light Armor Penetrator-Tracer (SLAP-T), M962: 9-41
- Cartridge, Caliber .50, Ball, Practice, T249E2: 9-43
- Cartridge, Caliber .50, Ball, High Pressure Test, T251: 9-45

### CHAPTER 10. 5.56MM CARTRIDGES

- Cartridge, 5.56mm, Ball, M193: 10-3
- Cartridge, 5.56mm, Grenade, M195: 10-5
- Cartridge, 5.56mm, Tracer, M196: 10-7
- Cartridge, 5.56mm, High Pressure Test, M197: 10-9
- Cartridge, Dummy, 5.56mm, M199: 10-11
- Cartridge, 5.56mm, Blank, M200: 10-13
- Cartridge, Dummy, 5.56mm, M232: 10-15
- Cartridge, 5.56mm, Blank, M755: 10-17
- Cartridge, 5.56mm, Ball, M855: 10-19
- Cartridge, 5.56mm, Tracer, M856: 10-21
- Cartridge, 5.56mm, Plastic, Practice, M862: 10-23

### CHAPTER 11. 7.62MM CARTRIDGES

- Cartridge, 7.62mm, Ball, M59: 11-3
- Cartridge, 7.62mm, High Pressure Test, M60: 11-5
- Cartridge, 7.62mm, Armor Piercing, M61: 11-7
- Cartridge, 7.62mm, Tracer, M62: 11-9
- Cartridge, 7.62mm, Tracer, M62 (Overhead Fire Mission): 11-11
- Cartridge, Dummy, 7.62mm, M63: 11-13
- Cartridge, 7.62mm, Grenade, M64: 11-15
- Cartridge, 7.62mm, Ball, M80: 11-17
- Cartridge, 7.62mm, Ball, M80 (Overhead Fire Application): 11-19
- Cartridge, 7.62mm, Blank, M82: 11-21
- Cartridge, 7.62mm, Ball, Special, M118: 11-23
- Cartridge, 7.62mm, Frangible, M160: 11-25
- Cartridge, Dummy, 7.62mm, M172: 11-27
- Cartridge, 7.62mm, Dim Tracer, M276: 11-29
- Cartridge, 7.62mm, Match, M852: 11-31

### CHAPTER 12. 9MM CARTRIDGES

- Cartridge, 9mm, Ball: 12-3
- Cartridge, 9mm, Ball, NATO, M882: 12-5
- Cartridge, 9mm, High Pressure Test, M905: 12-7

### CHAPTER 13. 14.5MM CARTRIDGES

- Cartridge, 14.5mm, Trainer-Spotter, M181A1: 13-3
- Cartridge, 14.5mm, Trainer-Spotter, M182A1: 13-5
- Cartridge, 14.5mm, Trainer-Spotter, M183A1: 13-7
CHAPTER 14. 20MM CARTRIDGES
Cartridge, Dummy, 20mm, M51A2.......................................................... 14-3
Cartridge, 20mm, Armor Piercing Incendiary-Tracer, M52E1............... 14-5
Cartridge, 20mm, Armor Piercing Incendiary, M53............................ 14-7
Cartridge, 20mm, Ball, High Pressure Test, M54A1............................ 14-9
Cartridge, 20mm, Target Practice, M55A2......................................... 14-11
Cartridge, 20mm, High Explosive Incendiary, M56A3/M56A4............. 14-13
Cartridge, 20mm, Armor Piercing-Tracer, M95................................ 14-15
Cartridge, 20mm, Incendiary, M96................................................... 14-17
Cartridge, 20mm, High Explosive Incendiary, M97A2........................ 14-19
Cartridge, 20mm, Target Practice, M99A1....................................... 14-21
Cartridge, 20mm, Target Practice, M204......................................... 14-23
Cartridge, 20mm, Target Practice-Tracer, M206A1............................. 14-25
Cartridge, 20mm, High Explosive Incendiary, M210........................... 14-27
Cartridge, 20mm, Target Practice-Tracer, M220................................ 14-29
Cartridge, 20mm, High Explosive Incendiary-Tracer, M242/M242A1 ... 14-31
Cartridge, 20mm, High Explosive Incendiary-Tracer, Self-Destroying,
M246/M246A1................................................................................ 14-33
Cartridge, Dummy, 20mm, XM254 ................................................... 14-35
Cartridge, 20mm, High Explosive Incendiary-Tracer, M599 Fuze
Point-Detonating Self-Destroying M594............................................ 14-37
Cartridge, 20mm, Armor Piercing Incendiary-Tracer, M601................ 14-39
Cartridge, 20mm, Multipurpose Trace Self-Destroying, M940 ............ 14-41

CHAPTER 15. 25MM CARTRIDGES
Cartridge, 25mm, Armor Piercing Discarding Sabot-Tracer, M791 ...... 15-3
Cartridge, 25mm, High Explosive Incendiary-Tracer, M792 With
Fuze Point-Detonating Self-Destroying M758................................... 15-5
Cartridge, 25mm, Target Practice-Tracer, M793................................. 15-7
Cartridge, 25mm, Dummy, M794...................................................... 15-9
Cartridge, 25mm, Decoy, M839........................................................ 15-11
Cartridge, 25mm, Target Practice Discarding Sabot-Target, M910...... 15-13
Cartridge, 25mm, Armor Piercing Fin Stabilized Discarding Sabot-
Tracer, M919............................................................................... 15-15

CHAPTER 16. 30MM CARTRIDGES
Cartridge, 30mm, Target Practice, M788......................................... 16-3
Cartridge, 30mm, High Explosive Dual Purpose, M789..................... 16-5
Cartridge, 30mm, Dummy, M848....................................................... 16-7
Cartridge, 30mm, Test, M883............................................................ 16-9

CHAPTER 17. POINT-DETONATING FUZES
Fuze, Point-Detonating: M505A3....................................................... 17-3
Fuze, Point-Detonating, Self-Destroying: M758................................ 17-5
Fuze, Point-Detonating: M759 (XM714E6)........................................ 17-7

CHAPTER 1
INTRODUCTION

1-1. PURPOSE

This manual is a reference handbook published as an aid in planning, training, familiarization and identification of small arms ammunition, ranging from 22 caliber through 30 millimeter and shotgun ammunition from .410 to 10 gage. This is the Federal Supply Class 1305. Operating instructions are contained in the appropriate weapons manuals.

e. Numerical values, such as weights, dimensions, candlepower, etc., are nominal values, except when specified as maximum or minimum. Actual items may vary slightly from these values. Allowable limits can be obtained from the drawings indicated in the data sheets.

1-2. SCOPE

a. For each item of materiel, there are illustrations and descriptions together with characteristics and related data. Included in the related data are weights, dimensions, performance data, shipping and storage data, type classification, and logistics control code (LCC). Refer to SC 1305/30-IL for weight, dimensions and cube of packing boxes for small arms ammunition.

b. Information concerning supply, operation, and maintenance of the items will be found in the publications referenced for those items. A complete listing of these publications is maintained in DA Pam 310 series indexes.

c. Within this manual, items with the following type classifications are included:

(1) Standard (STD)
(2) Contingency (CON)
(3) Limited Procurement (LP)
(4) Reclassified obsolete (OBS) for regular Army use, but used by National Guard or Reserve Units.
(5) Reclassified OBS for all Army use, but used by Marine Corps, Air Force or Navy.
(6) Reclassified OBS, no users, but U.S. stocks remain.

d. Items with the following type classification are not included: Reclassified OBS for all U.S. use. No U.S. stocks remain. (Foreign use or stock may remain.)

1-3. KEY TO ABBREVIATIONS AND SYMBOLS

A ------------ Army
AF ------------ Air Force
band ------------ bandoleer
belt ------------ linked ammo (cloth or metal)
bx ------------ box
cal ------------ caliber
cm ------------ centimeter(s)
comm ------------ commercial
ctg ------------ cartridge
ctx ------------ carton
DODIC ......... Department of Defense Identification Code
DODAC ......... Department of Defense Ammunition Code
ft .............. foot/feet
fps ............ feet per second
g .............. gram(s)
gr .............. grain(s)
GSA .......... General Services Administration
H .............. Height
in ............. inch(es)
L .............. Length

CHAPTER 2

SHOTGUN CARTRIDGES
CARTRIDGE, .410, SHOTGUN, NO. M35

Type Classification:
OBS - MSR 11756003.

Use:
Rifle/Shotgun, Caliber .22/.410 Bore, Survival, M6. The cartridge is intended for use in survival weapons against small game.

Description:
The cartridge case is all aluminum, and is loaded with smokeless powder and No. 6 copper-coated lead shot.

Tabulated Data:

. CARTRIDGE, 10 GAGE, SHOTGUN, BLANK

Type Classification:

STD - OTCM 36524.

Use:

This is an optional use item for reveille and retreat salutes, and is fired in the 3-inch gun, 75mm gun, 75mm howitzer, or 105mm howitzer.

Description:

The cartridge is similar to standard shotgun cartridges but it contains no lead shot. It has a paper cartridge case. The forward closing disc is marked "BLANK."

Function:

The cartridge is designed to produce a noise when initiated. It is used as a salute item in large caliber weapons. The blank is inserted either in a prepared cartridge case or in a breech block of the weapon being used.

CARTRIDGE, CALIBER .22, TRACER, LONG RIFLE, M861

Type Classification:
STD - DA Letter.

Use:
Rifle M16A1 when adapted with the M261 Conversion Kit. The M861 cartridge, when fired from the rim-fired adapter M16A1 Rifle mounted on the Brewster Device, will increase the training proficiency in scaled range tank gunnery exercise by providing a visual display for tracking purposes.

Description:
TRACER Cartridge. The cartridge M861, .22 Caliber Long Rifle, rimfire with tracer is a commercially produced item, manufactured by Dynamit - Nobel AG. The M861 is designed to be fired in the M16A1 rifle when adapted with the M261 Conversion Kit. It can be fired in the automatic or semi-automatic modes. The tracer (red) is visible between 27 and 192 feet in daylight to allow the gunner to observe and sense the impact of the tracer with normal vision and sighting devices when fired on the scaled range. The M861 is identified by a red painted tip.

CARTRIDGE, DUMMY, CALIBER .30, CARBINE, M13

Type Classification:
OBS - MSR 11756003.

Use:
Caliber .30, Carbine, M1 or M2. The cartridge is completely inert and is used for practice in loading weapons, for simulated firing to detect flinching of personnel when firing, and for inspecting and testing the mechanisms of the weapon.

Description:
DUMMY Cartridge. The cartridge is identified by two holes in the cartridge case and the absence of the primer.

CARTRIDGE, CALIBER .30, TRACER, M1

Type Classification:

OBS - MSR 11756003.

Use:

Machine Guns, Caliber .30, M37, M1919A4 and M1919A6; and Rifle, Caliber .30, M1. The tracer element is intended to permit visible observation of the bullet’s in-flight path, or trajectory, to the target.

Description:

TRACER Cartridge. The cartridge is identified by a red bullet tip.

Tabulated Data:

DODAC------------------ 1305-A231
UNO serial number ------- 0012
UNO proper shipping name----------------- Cartridges for weapons, inert projectile

Weight ------------------ 399 gr

CARTRIDGE, CALIBER .30, ARMOR PIERCING INCENDIARY, M14

Type Classification:

OBS - MSR 11756003.

Use:

Machine Guns, Caliber .30, M37, M1919A4 and M1919A6; and Rifle, Caliber .30, M1.

Description:

ARMOR PIERCING INCENDIARY Cartridge. The cartridge is identified by an aluminum bullet tip.

Function:

Penetration, fired at a 7/8-inch steel plate at 100 yards, will not be less than 0.42 inch. Upon impact with a target, the incendiary composition bursts into flame and will ignite flammable material.

Tabulated Data:

DODAC----------------------------- 1305-A202

CARTRIDGE, CALIBER .30, BALL, FRANGIBLE, M22

Type Classification:

OBS - MSR 11756003.

Use:

Machine Guns, Caliber .30, M37 and M1919A4; and Rifle, Caliber .30, M1.

Description:

BALL Cartridge. The cartridge is identified by a green bullet tip with a white ring to the rear of the green color.

Function:

The bullet disintegrates upon striking a hard or armored target, leaving a pencil-like mark to indicate a hit during gunnery practice.

.CARTRIDGE, CALIBER .30, TRACER, M25

**Type Classification:**

OBS - MSR 11756003.

**Use:**

Machine Guns, Caliber .30, M37, M1917A1, M1919A4, and M1919A6, and Rifle, Caliber .30, M1. The cartridge is intended for use against personnel and unarmored targets.

**Description:**

TRACER Cartridge. The cartridge is identified by an orange bullet tip.

**Function:**

In flight, the bullet exhibits a trace of full luminosity from a point not greater than 75 yards from the muzzle of the weapon to a point not less than 900 yards from the muzzle.

**Tabulated Data:**

TM 9-1005-222-12P/1
TM 9-1300-206
Type Classification:

STD - OTCM 37119.

Use:

All caliber .30 weapons except carbine. The cartridge is inert, and is used for practice in loading weapons, for simulated firing to detect flinching of personnel when firing, and for inspecting and testing the mechanisms of small-arms weapons.

Description:

DUMMY Cartridge. The cartridge is identified by six 1-inch longitudinal corrugations (flutings) in the cartridge case. In addition, there is no primer.

CARTRIDGE, CALIBER .30, BALL, MATCH, M72

Type Classification:

STD - OTCM 37119.

Use:

Rifle, Caliber .30, M1; and Rifle, Caliber .30, National Match. The cartridge is designed to be fired only in weapons designated as competition rifles.

Description:

BALL Cartridge. The cartridge is identified by head stampings on the base of the cartridge case with either the initials NM (National Match) or the word MATCH. The primer is uncrimped, the bullet has no crimped cannelure, and the case is not crimped to the bullet.

CHAPTER 8

CALIBER .45 CARTRIDGES
Type Classification:

OBS - MSR 08836015.

Use:

Pistol, Caliber .45, M1911A1, and Pistol, Caliber .45, National Match.

Description:

WAD CUTTER Cartridge. The cartridge is identified by the bullet shape which has the general appearance of a truncated cone.

Function:

The ogive of the bullet has a sharp shoulder that acts as a hole punch to cut a clean hole in the target.

Tabulated Data:

DODAC--------------------- 1305-A482

CARTRIDGE, CALIBER .45, BLANK, M9

**Type Classification:**

STD - AMCTC 505.

**Use:**

Pistol, Automatic, Caliber .45, M1911A1. The cartridge is used for simulated firing in training maneuvers and for saluting purposes.

**Description:**

BLANK Cartridge. The cartridge is identified by the absence of a bullet and the tapered mouth of the cartridge case.

**Tabulated Data:**

**CARTRIDGE, CALIBER .45, LINE THROWING, M32**

**Type Classification:**

STD A - OTCM 36841.

**Use:**

Line Throwing Gun, Caliber .45/.70.

**Description:**

LINE THROWING Cartridge. The cartridge is composed of a brass case, primer, commercial smokeless powder, and two felt wads coated on both sides with gummed paper. The wads are sealed with red lacquer. The cartridge case mouth is crimped to prevent entry of the line throwing rod.

**Function:**

The line throwing rod is placed in the weapon barrel. Cartridge initiation provides pressure to force the rod out of the barrel and propel the line to the target.

**Tabulated Data:**

DODAC: 1305-A477
UNO serial number: 0014

CARTRIDGE, CALIBER .45, BALL, MATCH, M1911

Type Classification:

STD - OTCM 36841.

Use:

Pistol, Caliber .45, M1911A1; and Pistol, Caliber .45, National Match. The cartridge is to be used only in those weapons designated as competition pistols.

Description:

BALL Cartridge. The cartridge is identified by head stampings, either NM (National Match) or MATCH, on the base of the cartridge case.

Tabulated Data:

CHAPTER 9

CALIBER .50 CARTRIDGES
**CARTRIDGE, CALIBER .50, BALL, HIGH PRESSURE TEST, M1**

---

**Type Classification:**

STD - OTCM 36841.

**Use:**

All caliber .50 weapons except M8C Spotting Gun. The cartridge is intended for use in proof testing caliber .50 weapons (except the 106mm Spotting Rifle) during manufacture, test, or repair.

**Description:**

BALL Cartridge. The cartridge is identified by a stannic-stained (silvered) cartridge case.

CARTRIDGE, CALIBER .50, BLANK, M1A1

**Type Classification:**

STD - MSR 02806015.

**Use:**

Machine Gun, Caliber .50, M2 with the M19 Blank Ammunition Firing Attachment; and Machine Gun, Caliber .50, M85 with the M20 Blank Firing Attachment. The cartridge is used to simulate firing in training exercises.

**Description:**

BLANK Cartridge. The cartridge is identified by the absence of a bullet. The M1A1 differs from the M1 in that the M1A1 has a rosette crimp at the mouth. Also, the M1A1 is loaded with DuPont Hi Skor 700X propellant.

CARTRIDGE, CALIBER .50, BALL, ARMOR PIERCING INCENDIARY, M8

**Type Classification:**

OBS - MSR 11756003.

**Use:**

Machine Guns, Caliber .50, M2 and M85. The cartridge combines the functions of the M2 armor piercing bullet and the incendiary bullet, and is used against flammable targets and light-armored or unarmored targets, concrete shelters, and similar bullet-resisting targets.

**Description:**

BALL Cartridge. The cartridge is identified by an aluminum bullet tip.

CARTRIDGE, CALIBER .50, TRACER, M10

Type Classification:
STD - OTCM 37107.

Use:
Machine Guns, Caliber .50, M2 and M85.

Description:
TRACER Cartridge. The cartridge is identified by an orange bullet tip.

Function:
The tracer cartridge exhibits a visible trace from a point not greater than 100 yards from the muzzle of the weapon to a point not less than 1,600 yards from the muzzle.

Tabulated Data:

CARTRIDGE, CALIBER .50, BALL, ARMOR PIERCING INCENDIARY-TRACER, M20

Type Classification:

OBS - MSR 04776009.

Use:

Machine Guns, Caliber .50, M2 and M85. The cartridge combines the functions of the armor piercing and the incendiary bullet, and is used against flammable targets and light-armored or unarmored targets, concrete shelters, and similar bullet-resisting targets.

Description:

BALL Cartridge. The cartridge is identified by a red bullet tip with an aluminum colored ring to the rear of the red tip.

Tabulated Data:

DODAC------------------ 1305-A542
UNO serial number ------- 0300

CARTRIDGE, CALIBER .50, INCENDIARY, M23

Type Classification:

STD - OTCM 36841.

Use:

Machine Guns, Caliber .50, M2 and M85. The cartridge is used against flammable targets.

Description:

INCENDIARY Cartridge. The cartridge is identified by a blue bullet tip with a light blue ring to the rear of the blue tip.

Purpose:

The cartridge is capable of initiating combustion of flammable materials upon target impact at 175 yards.

CARTRIDGE, CALIBER .50, BALL, SPOTTER-TRACER, M48A1

Type Classification:

STD - AMCTC 7378.

Use:

Rifle, Spotting, Caliber .50, M8C.

Description:

BALL Cartridge. The cartridge has specific features which aid in identification. The cartridge case has a distinctive body design which prevents chambering in other weapons. The total length is only 4.5 inches in comparison with 5.5 inches for a standard round. The bullet has a yellow tip with a red ring to the rear of the yellow tip.

Function:

In flight, the bullet exhibits a visible trace from a point not greater than 100 yards from the muzzle of the weapon to a point not less than 1,500 yards from the muzzle. The bullet will detonate and produce a flash and a puff of smoke upon impact against a steel plate placed at 175 yards from the muzzle of the weapon at all angles from 90° to 11° with respect to the horizontal.

Difference Between Models:

The M48A1 differs from the M48A2 in that the M48A1 has a primer in the point of the bullet.

Tabulated Data:

- DODAC: 1305-A574
- UNO serial number: 0339
- UNO proper shipping name: Cartridges for weapons, inert projectile

CARTRIDGE, CALIBER .50, BALL, PRACTICE, T249E2

Type Classification:

Not applicable.

Use:

Rifle, Spotting, Caliber .50, M8C. The cartridge is used as a less expensive substitute for the M48 series spotter-tracer cartridges. The item uses a small amount of Sodium Carbonate Monohydrate as its spotting charge. It is similar to using a flour bag as a bomb.

Description:

BALL Cartridge. The cartridge is a duplicate of the M48 series cartridges, a less expensive model used for practice. It is identified by a green bullet tip. It has no tracer or incendiary filler.

Performance:
CARTRIDGE, 5.56MM, GRENADE, M195

**Type Classification:**

STD - AMCTC 6919.

**Use:**

Rifles, 5.56mm, M16 and M16A1.

**Description:**

GRENADE Cartridge. The cartridge is identified by a rose-petal (rosette-crimp) closure of the cartridge case mouth sealed with red lacquer.

**Function:**

The cartridge provides pressure, on functioning, to project grenades to a desired target using a grenade projection adapter.

10-7
Type Classification:

STD - AMCTC 4662.

Use:

Rifles, 5.56mm, M16 and M16A1. The cartridge is used for practice in loading 5.56mm weapons, for simulated firing to detect flinching of personnel when firing, and for inspecting and testing the weapon mechanisms.

Description:

DUMMY Cartridge. The cartridge is identified by six longitudinal corrugations (flutings) in the cartridge case and there is no primer.

CARTRIDGE, 5.56MM, BLANK, M755

Type Classification:

STD - MSR 04786005.

Use:

The M755 blank cartridge is especially designed for use with the Sting Ring Airfoil Munition System which consists of the M234 launcher and the 64mm riot control M743 projectile fired from the M16A1 rifle.

Description:

BLANK Cartridge. The cartridge is only for use with the M234 riot control 64mm projectile launcher. The launcher is attached to the flash suppressor of the M16A1 rifle and actuated by firing an M755 5.56mm blank cartridge. The M755 blank cartridge is the only cartridge that will give the projectile M743 the proper velocity. Use of other blank cartridges may damage the system.

The cartridge is loaded with 12 grains of Dupont Hi Skor 700X propellant closed with a seven petal nose crimp and moisture sealed. The crimped tips of the cartridge is painted with yellow lacquer for identification and thus lessen the chance of mixing them with the standard M16A1 rifle blank cartridges.

Function:

The blank cartridge is fed into the firing chamber. When fired, the primer ignites the propellant. The expanding propellant gases pass from the muzzle of the rifle into the launcher manifold. The projectile is ejected from the launcher barrel. The propellant charge is not sufficient to eject the cartridge case which must be ejected by pulling the charging handle of the rifle all the way back.

CARTRIDGE, 7.62MM, HIGH PRESSURE TEST, M60

Type Classification:

OBS - MSR 11756003.

Use:

All 7.62mm weapons. The cartridge is not for field issue, but is used for proof firing of weapons during manufacture, test, or repair.

Description:

HIGH PRESSURE TEST Cartridge. The cartridge is identified by a stannic-stained (silvered) case.

Function:

The cartridge is loaded with a special propellant to produce pressures substantially in excess of the service cartridge.

CARTRIDGE, 7.62MM, TRACER, M62 (OVERHEAD FIRE MISSION)

Type Classification:

CON - MSR 11756003.

Use:

Machine Guns, 7.62mm, M60, M219 and M240; and Rifle, 7.62mm, M14. The cartridge is used in weapons for firing over the heads of troops being trained in field exercises. Stringent production control and screening of ammunition lots ensure the safety of personnel operating immediately below the trajectory of the fired bullets.

Description:

TRACER Cartridge. The cartridge is identified by a red bullet tip.

CARTRIDGE, DUMMY, 7.62MM, M63

Type Classification:

STD - OTCM 36841.

Use:

Machine Guns, 7.62mm, M60, M219 and M240; and Rifle, 7.62mm, M14. The cartridge is used for practice in loading 7.62mm weapons for simulated firing to detect flinching of personnel during firing and for inspecting and testing the weapon mechanism.

Description:

DUMMY Cartridge. The cartridge is identified by six longitudinal corrugations (flutings) on the cartridge case. There is no primer and no vent hole in the primer pocket.

CARTRIDGE, 7.62MM, GRENADE, M64

Type Classification:
OBS - MSK 11756003.

Use:
Rifle, 7.62mm, M14.

Description:
GRENADE Cartridge. The cartridge is identified by a rose-petal (rosette-crimp) closure of the cartridge case mouth and sealed with red lacquer.

Function:
The cartridge provides pressure upon functioning to project rifle grenade to a desired target when using a grenade projectile adapter and dragon missile launch effect trainer (LET).

Tabulated Data:

CARTRIDGE, 7.62MM, FRANGIBLE, M160

**Type Classification:**

STD - AMCTC 2186.

**Use:**

Machine Guns, 7.62mm, M219 and M240. The cartridge is designed for firing single shots in the machine gun for gunnery practice.

**Description:**

FRANGIBLE Cartridge. The cartridge is identified by a green bullet tip with a white ring to the rear of the green tip.

**Function:**

The frangible bullet, upon striking a target, disintegrates, leaving a mark at the point of impact. It is not to be fired on indoor ranges unless they are well ventilated to prevent the buildup of bullet "dust," which is toxic.

CARTRIDGE, DUMMY, 7.62MM, M172

Type Classification:
STD - AMCTC 4635.

Use:
Test of 7.62mm weapons. The cartridge is inert and is used to test the mechanism and metallic link belts of 7.62mm weapons.

Description:
DUMMY Cartridge. The cartridge is identified by a black oxide finish over the entire round and has no primer. There is no vent hole in the primer pocket.

CARTRIDGE, 7.62MM, DIM TRACER, M276

Type Classification:

STD - Being performed.

Use:

Rifle, 7.62mm, M14; Machine Guns, 7.6mm, M60, M240, M219 and M134. The combat cartridge is to be used by soldiers equipped with night vision equipment.

Description:

COMBAT Cartridge. The cartridge is identified by a pink ring behind a green tip.

Tabulated Data:

- DODAC: 1305-A163
- UNO serial number: 0012
- UNO proper shipping name: Cartridges for weapons, inert projectile
- Weight: 381 gr
- Length: 2.8 in.
- Tracer: R440 Trace Mix
- Primer: Percussion
- Fuze: NA

Explosive:
- Type: NA
- Weight: NA

Incendiary:
- Type: NA
- Weight: NA

Propellant:
- Type: WC-846
- Weight: 46 gr
- Projectile weight: 140-150 gr

Performance:

- Chamber pressure: 50,000 psi
- Velocity: 2750 fps (GMCS) and 2680 fps (GM), 78 ft from muzzle

Shipping and Storage Data:

- Quantity-distance class/SCG: 1.4S
- Storage code: C
- DOT shipping class: C
- DOT designation: CARTRIDGES SMALL ARMS

CARTRIDGE, 7.62MM, MATCH, M852

Type Classification:
STD - MSR 09816009.

Use:
Rifle, 7.62mm, M14, NATIONAL MATCH. The cartridge is intended and specifically prepared for use in those weapons designated as competitive rifles and also for marksmanship training. The cartridge is not for combat use.

Description:
MATCH Cartridge. The cartridge is identified by the cartridge case head stamping of MATCH. It also has a knurl at the base of the cartridge case and a hollow point bullet.

Tabulated Data:
- DODAC: 1305-A171
- UNO serial number: 0012
- UNO proper shipping name: Cartridges for weapons, inert projectile
- Weight: 385 gr
- Length: 2.83 in. (71.9 mm)

CHAPTER 13

14.5MM CARTRIDGES
Type Classification:

STD - AMCTC 138.

Use:

Artillery Trainer, M31.

Description:

TRAINER-SPOTTER Cartridge. The cartridge has a chemical-filled (smoke composition) projectile. It is identified by the markings on the cartridge case and a yellow projectile tip. The cartridge has no fuze and it uses a time delay element to provide an air burst.

Function:

When the cartridge is fired, the heat of the propellant gases ignites the delay element. The delay element burns 3 seconds and, in turn, ignites the smoke composition. The heat and pressure produced by the burning filler rupture the plastic closing disc at the projectile base and a visible puff of smoke is emitted.

Tabulated Data:

CARTRIDGE, 14.5MM, TRAINER-SPOTTER, M183A1

Type Classification:
STD - AMCTC 138.

Use:
Artillery Trainer, M31.

Description:
TRAINER-SPOTTER Cartridge. The cartridge consists of a cartridge case, a chemical-filled (smoke composition) projectile, and a fuze with a small explosive charge to provide a visible and audible verification at point of impact. The cartridge is identified by the markings on the cartridge case and a yellow projectile tip.

Function:
The projectile impacts with the target. The point detonating fuze functions and an explosion charge within the fuze ignites the smoke composition and ejections it out the base of the projectile.

CHAPTER 14

20MM CARTRIDGES
Type Classification:

STD - AMCTC 6900.

Use:

Guns, 20mm, M39, M61, M139, M168, M195 and M197. The cartridge is a completely inert assembly used for filling the conveyor system during shipment or storage and for nonfiring system checkout.

Description:

DUMMY Cartridge.

CARTRIDGE, 20MM, ARMOR PIERCING INCENDIARY-TRACER, M52E1

Type Classification:

STD - OTCM 37404.

Use:

Guns, 20mm, M39, M61 and M195. The cartridge is used against moderately armed targets and when incendiary effect is needed.

Description:

ARMOR PIERCING INCENDIARY-TRACER Cartridge. The armor piercing shot is the main part of the projectile. The ballistic cap (ogive) contains an incendiary composition. The cartridge is identified by a projectile painted black with red markings.

Function:

The nose/ogive of the projectile impacts with the target and ruptures, and the incendiary composition ignites upon exposure to the air.

CARTRIDGE, 20MM, TARGET PRACTICE, M55A2

Type Classification:

STD - AMCTC 7741.

Use:

Guns, 20mm, M39, M61 and M68. The cartridge is a training round intended as a substitute for a service round to be used in target practice.

Description:

TARGET PRACTICE Cartridge. The one piece projectile cavity is hollow. The nose (ogive) made of aluminum or steel is swaged to the projectile body. The projectile is painted blue with markings in black. It consists of a solid projectile without a fuze.

Function:

The projectile is inert, therefore no specific function takes place upon impact except penetration of the target.

CARTRIDGE, 20MM, HIGH EXPLOSIVE INCENDIARY, M56A3/M56A4

Type Classification:

Use:

Guns, 20mm, M39, M61, M168 and M195. The cartridge is for use against ground targets, including lightly armored vehicles, functioning with both explosive and incendiary effect. The projectile consists of a high explosive incendiary (HEI) charge and is assembled with the M505A3 fuze.

Description:

HIGH EXPLOSIVE INCENDIARY Cartridge. The projectile is thin-walled steel. A base plate is attached to the projectile to prevent ignition of the incendiary mixture by the propellant gases. A point-detonating (PD) fuze is screwed into the nose of the projectile.

Function:

The M505A3 fuze is a point-detonating, single-action fuze intended to function upon impact with the target.

Difference Between Models:

The models differ in the method of loading the projectiles. The M56A3 has the HE mix and the incendiary mix combined in one pellet. The M56A4 has the incendiary pellet inserted into the projectile, then the HE mix pellet is added. This improves fire start capability.

CARTRIDGE, 20MM, ARMOR PIERCING-TRACER, M95

**Type Classification:**

CON - OTCM 36841.

**Use:**

Guns, 20mm, M3 and M24A1.

**Description:**

ARMOR PIERCING-TRACER Cartridge. The projectile is a solid shot type, made from bar or forged steel. A steel windshield is crimped to the forward part of the projectile body. The base of the projectile contains a red tracer composition.

**Function:**

When the primer is initiated, the propellant ignites. Ignition of the propellant ignites the tracer composition in the base of the projectile. The tracer burns the first 2.25 seconds of projectile flight, or an approximate range of 1,400 yards.

CARTRIDGE, 20MM, INCENDIARY, M96

Type Classification:

CON - OTCM 36841.

Use:

Guns, 20mm, M3 and M24A1.

Description:

INCENDIARY Cartridge. The body of the projectile is made from cold draco steel. The projectile nose and body are filled with incendiary composition.

Function:

Impact with the target by the projectile produces compression of the heat and friction sensitive elements in the incendiary mixture causing ignition of the mixture.

Tabulated Data:

CARTRIDGE, 20MM, HIGH EXPLOSIVE INCENDIARY, M97A2

Type Classification:

STD - AMCTC 4376.

Use:

Gun, 20mm, M24A1.

Description:

HIGH EXPLOSIVE INCENDIARY Cartridge. The projectile has a hollow body filled with an incendiary composition and a high explosive (called RDX). The base of the projectile has a base cover and the forward end has a point-detonating (PD) fuze.

Function:

When the primer is initiated, the propellant ignites. Ignition of the propellant provides hot gases to propel the projectile from the weapon. Upon impact, the point detonating fuze functions, initiating the high explosive filler and dispersing the incendiary composition.

CARTRIDGE, 20MM, HIGH EXPLOSIVE INCENDIARY, M210

**Type Classification:**

STD - AMCTC 5433.

**Use:**

Guns, 20mm, M3 and M24A1. The projectile is effective against aircraft and other targets that are not heavily armored.

**Description:**

HIGH EXPLOSIVE INCENDIARY Cartridge. The cartridge has a yellow painted projectile body with a red band, approximately 1/4 inch wide, at forward end. The projectile has a steel body with a cavity filled with RDX and aluminum and a point-detonating (PD) bore-safe fuze.

**Function:**

The projectile fuze arms in flight. Upon impact, the fuze detonates the projectile causing fragmentation of the body with an incendiary effect.

CARTRIDGE, 20MM, TARGET PRACTICE-TRACER. M220

Type Classification:

STD - AMCTC 7404.

Use:

Guns, 20mm, M39, M61 and M168. The cartridge is for practice and training.

Description:

TARGET PRACTICE-TRACER Cartridge. The cartridge is ballistically and physically identical to the M55A2 cartridge except that a tracer element has been added to the base of the projectile. The projectile is painted blue with orange colored markings.

Function:

The projectile is similar to the M56A3 projectile, but has no high explosive incendiary charge and is assembled with a dummy fuze. The projectile does contain a tracer composition which burns visibly for a minimum of 1.9 seconds.

Tabulated Data:

CARTRIDGE, 20MM, HIGH EXPLOSIVE INCENDIARY-TRACER, SELF-DESTROYING, M246/M246A1

Type Classification:
M246: STD - LCC-B MSR 03816015.

Use:
Gun, 20mm, M168. The cartridge is for use against aerial targets.

Description:
HIGH EXPLOSIVE INCENDIARY-TRACER, SELF-DESTROYING Cartridge.

Function:
The cartridge is assembled with an M505A3 point-detonating (PD) fuze. The projectile, in addition to the M505A3 fuze, consists of a high explosive incendiary (HEI) charge, self-destructing (SD) relay charge, and a tracer charge. These charges form the SD chain. The tracer burns for about 3 to 7 seconds, whereupon the relay charge is ignited which detonates the HEI charge low order. If impact with target occurs prior to self-destruction, the M505A3 fuze causes the HEI charge to detonate high order.

Difference Between Models:
The basic difference between the models is in the loading of the projectiles. In the M246 projectile, the incendiary mix and the HE mix are combined in one pellet. In the M246A1 projectile, the incendiary is loaded as a separate pellet. The HE mix is also loaded as a separate pellet along with the SD relay charge pellet and the tracer charge pellet. This improves fire start capability.

14-35
CARTRIDGE, 20MM, HIGH EXPLOSIVE INCENDIARY-TRACER, M599 FUZE POINT-DETONATING SELF-DESTROYING M594

**Type Classification:**
STD - AMCTC 6391.

**Use:**
Gun, M139.

**Description:**
HIGH EXPLOSIVE INCENDIARY-TRACER Cartridge. The cartridge has a point-detonating (PD) self-destroying (SD) fuze M594. The projectile is a hollow body filled with 120 grams of high explosive incendiary (HEI) mixture with a tracer tablet at the base and the PD SD fuze screwed onto the nose.

**Function:**
When fired, the weapon firing pin initiates the primer which ignites the propelling charge. Gases produced by the burning propellant propel the projectile. The projectile shall function with high order detonation upon impact or, if the projectile does not impact on intended target within 4 to 7 seconds, a SD mechanism will cause high order detonation of the projectile.

**Tabulated Data:**

- **DODAC** 1305-A787
- **UNO serial number** 0321
- **UNO proper shipping name** Cartridges for weapons with bursting charge
- **Type** HEI-T
- **Weight (approx)** 317 g

CARTRIDGE, 20MM, ARMOR PIERCING INCENDIARY-TRACER, M601

Type Classification:

STD - AMCTC 4762.

Use:

Gun, M139.

Description:

ARMOR PIERCING INCENDIARY-TRACER Cartridge. The tungsten-carbide core is the main part of the projectile, and is the penetrator. The ballistic cap (ogive) contains an incendiary pellet. A tracer tablet is at the base of the projectile. The projectile body is painted black with white markings and with red painted "T's" encircle the ogive (signifying tracer).

Function:

When fired, the weapon firing pin initiates the primer which ignites the propelling charge. Gases produced by the burning propellant propel the projectile. Upon impact with the target, the nose (ogive) ruptures and the incendiary composition ignites on exposure to the air.

Complete round:

M528 shipping and storage container:
Material Steel
Dimensions 14-9/16 x 9-39/64 x 4-5/16 in.
Cube 0.35 cu ft
Drawing number C/R 10535805

Packing:

25 cartridges, 20mm linked with M599 high explosive incendiary-tracer cartridges in a ratio of 3 M599 to 2 M601 in shipping and storage container M528. Two containers in a wrap-around crate.

References:
DARCOM 700-3-2
TM 9-1300-206
CARTRIDGE, 20MM, MULTIPURPOSE TRACE SELF-DESTROYING, M940

Type Classification:

Use:

The existing Vulcan Air Defense System (VADS) and Product Improved Vulcan Air Defense System (PIVADS) M246 ammunition is incapable of providing defense against the modern enemy threat at combat ranges greater than 1,600 meters because of inherent performance limitations including poor flight characteristics, self-destroying ranges, and terminal effectiveness. Therefore, the Army decided to pursue acquiring a new round of ammunition for VADS/PIVADS which would exhibit better exterior ballistics and greater lethality than the existing M246 High Explosive Incendiary-Tracer Self-Destroying (HEI-T-SD) ammunition.

Description:

MULTIPURPOSE TRACE SELF-DESTROYING Cartridge. The cartridge is an improved fuzeless pyrotechnic initiated 20mm HE cartridge. The projectile consists of a heavy-walled steel body charged with explosive mix and an incendiary mix, and an aluminum nose charged with another incendiary mix. The projectile also has safe and arming (S&A), tracer, and self-destroying which is initiated by heat from combustion of the tracer composition. The lack of fuze permits an enhanced aerodynamic ogive shape which results in a reduction in drag factor and reduced time of flight, thereby extending the effectiveness of the VADS from 1,200 meters to 2,000 meters against aircraft targets. The M940 will replace the 20mm M246 HEI-T-SD as the primary air defense cartridge for the VADS and any of its improved versions.

Function:

The projectile consists of a steel body charged with a HE mix, Composition A-4 (MIL-C-440), and an incendiary mix, Type I (equivalent I-68). The projectile has an aluminum nose charged with Type II incendiary (equivalent I-136). The hardened forebody of the projectile provides for defeat of lightweight armor (3/8 RHA at well over 500 m). The incendiaries provide a built-in delay when initiated on the thin skin of an aircraft, and the projectile explodes approximately 1 foot behind the skin. The M940 cartridge, therefore, is primarily intended for air defense but has a secondary roll against light armored vehicles. The M940 contains a chemical S&A intended to reduce the probability of functioning on a 0.04 aluminum plate at 1 meter from the muzzle. When initiated, all projectile fragments go forward.

25MM CARTRIDGES
CARTRIDGE, 25MM, ARMOR PIERCING DISCARDING SABOT-TRACER, M791

![Diagram of Cartridge]

**Type Classification:**

STD - MSR 12796010.

**Use:**

Automatic cannon, 25mm, M242.

**Description:**

ARMOR PIERCING DISCARDING SABOT-TRACER Cartridge. The cartridge is a fixed type, percussion primed 25mm ammunition, intended as the armor piercing service round to successfully engage lightly armored vehicles. The cartridge consists of a sabot encapsulated projectile body, crimped to a steel cartridge case containing 98 grams of extruded propellant, M115 percussion primer and booster pellet. The projectile body consists of a solid tungsten alloy penetrator, pressed on aluminum wind-shield, pressed-in tracer pellets, molded discarding-type nylon sabot, staked aluminum base and pressed-on polyethylene nose cap.

**Function:**

When fired, the weapon firing pin initiates the primer which ignites the propelling charge. Gases produced by the burning propellant propel the projectile from the cannon and ignite the tracer. Setback, centrifugal and air pressure forces cause the sabot to discard upon leaving the gun tube. The penetrator (core) is spin-stabilized and penetrates the target solely by kinetic energy.

CARTRIDGE, 25MM, HIGH EXPLOSIVE INCENDIARY-TRACER, M792
WITH FUZE POINT-DETONATING SELF-DESTROYING M758

**Type Classification:**

STD - MSR 12796010.

**Use:**

Automatic cannon, 25mm, M242.

**Description:**

**HIGH EXPLOSIVE INCENDIARY-TRACER Cartridge.** The cartridge is a fixed type, percussion primed 25mm munition, intended as the high explosive service round to successfully engage unarmored ground targets. The cartridge consists of a high explosive incendiary (HEI) filled, one piece projectile body that is crimped to a steel cartridge case containing 90 grams of ball propellant, M115 percussion primer and booster pellet. The projectile body consists of a hollow C1045 steel body, screwed onto M758 fuze, swaged iron rotating band, 32 grams of H761 HEI mix and pressed-in tracer pellets. Projectile length, including tracer boom, varies by manufacturer from 3.94 to 4.66 inches.

**Function:**

When fired, the primer is mechanically initiated by the weapon firing pin. The primer output ignites the booster pellet which, in turn, ignites the propellant charge. The projectile is launched at a velocity of 1100 meters per second, achieving a maximum effective range of 3000 meters. Upon impact, the fuze functions and the HEI filler detonates dispersing the incendiary mixture. The self-destroying requirement is 6.2 seconds per minute and prior to impact.

CARTRIDGE, 25MM, TARGET PRACTICE-TRACER, M793

Type Classification:

STD - MSR 12796010.

Use:

Automatic cannon, 25mm, M242.

Description:

TARGET PRACTICE-TRACER Cartridge. The cartridge is a fixed type, percussion primed 25mm munition, intended as a substitute for the high explosive incendiary with tracer service round for target practice in training, gun testing, and gun system functioning. The cartridge consists of a hollow, two piece projectile body that is crimped to a steel cartridge case containing 90 grams of ball propellant, M115 percussion primer and booster pellet. The projectile body consists of a hollow C1035 steel body screw-on steel nose piece, swaged iron rotating even band and pressed-in tracer pellets.

Function:

The cartridge functions the same as the M792, except upon impact the projectile is inert.

CARTRIDGE, 25MM, DUMMY, M794

Type Classification:

Use:

Automatic cannon, 25mm, M242. The cartridge is used for non-firing system checkout for the 25mm automatic cannon M242 and training of the crew.

Description:

DUMMY Cartridge. The cartridge is a modified M793 target practice with tracer (TP-T) projectile silver brazed to a modified standard cartridge case and is completely inert. The cartridge case cavity is filled through an enlarged primer hole with an epoxy resin filler to approximate the weight of the M792 high explosive incendiary-tracer and M793 TP-T service cartridges. The threaded nose of the TP-T projectile is silver brazed to the projectile body to improve physical integrity. The external configuration of the M794 metal dummy cartridge (by use of standard components) is the same as that of the M792 HEI-T and M793 TP-T service cartridges.

References:

DARCOM 700-3-2
**Type Classification:**

STD - MSR 02816005.

**Use:**

The cartridge is a decoy to provide an effective survival counter-measure for Army aircraft against radar controlled weapon systems.

**Description:**

**DECOY Cartridge.** The cartridge is ammunition item consisting of a plastic outer case nominally 1-inch wide x 1-inch high x 8-inches long, a payload made up of approximately 390,000 strands of aluminum coated glass fibers. The payload is sectioned into several bundles of chaff dipoles. There are three different lengths of bundles in the payload. In addition, the item contains a plastic end cap, plastic piston, felt spacer, and impulse cartridge.

**Function:**

The cartridge is fired by electrical initiation of the impulse cartridge M796. The gases generated by the functioned impulse cartridge causes the piston to expel the chaff payload into the air where it blooms into a radar reflecting cloud that breaks "Lock On" by radar-controlled weapon systems.

Cartridge, 25mm, Target Practice Discarding Sabot-Target, M910

Type Classification:

To be approved.

Use:

Automatic cannon, 25mm, M242.

Description:

TARGET PRACTICE DISCARDING SABOT-TRACER Cartridge. The cartridge is a fixed type, percussion primed 25mm ammunition, intended as a training substitute for armor piercing service ammunition. The cartridge consists of a sabot encapsulated projectile body, crimped to a steel cartridge case containing 97 grams of extruded propellant, M115 percussion primer and booster pellet. The projectile body consists of a solid steel core, pressed-on aluminum windshield, pressed-in tracer pellets, molded discarding-type nylon sabot, staked aluminum base and pressed-on polyethylene nose cap.

Function:

When fired, the weapon firing pin initiates the primer which ignites the propelling charge. Gases produced by the burning propellant propel the projectile through the barrel and ignite the tracer. Centrifugal and air pressure forces cause the sabot, protective cap, and aluminum base to discard upon leaving the barrel. The high mass flow tracer decreases the base drag, allowing the spin-stabilized core to match the armor piercing round trajectory to a range of 2000 meters. Upon tracer burnout, the lightweight core loses velocity rapidly and eventually tumbles when its velocity goes below the speed of sound.

CARTRIDGE, 25MM, ARMOR PIERCING FIN STABILIZED DISCARDING SABOT-TRACER, M919

Type Classification:
STD.

Use:
Automatic cannon, 25mm, M242.

Description:
ARMOR PIERCING FIN STABILIZED DISCARDING SABOT-TRACER Cartridge. The cartridge is a fixed type, percussion primed 25mm ammunition, intended to supersede the M791 for use in combat. The cartridge consists of a subcaliber projectile inside an aluminum sabot, crimped to a steel cartridge case containing 9/ grams of extruded propellant, modified M115 percussion primer and flash tube. The subprojectile consists of a depleted uranium penetrator with a pressed-on aluminum wind-screen and a threaded steel fin with pressed-in tracer pellets. The three piece aluminum sabot utilizes a nylon obturator and a polyethylene nose cap.

Function:
When fired, the weapon firing pin initiates the primer which ignites the propelling charge. Gases produced by the burning propellant propel the projectile through the barrel and ignite the tracer. Centrifugal, air, and gas pressure forces cause the obturator, sabot, and nose cap to discard upon leaving the barrel. The low drag subcaliber projectile travels along its trajectory stabilized by the fin and a small amount of spin. The tracer allows visual contact with the fired round as it travels downrange. Upon impact, kinetic energy stored in the subprojectile causes it to punch through an armored target and inflict considerable damage inside, prohibiting any further use of the target.

30MM CARTRIDGES
CARTRIDGE, 30MM, TARGET PRACTICE, M788

Type Classification:

STD.

Use:

Automatic cannon, 30mm, XM230 (U.S.), ADEN MK IV (NATO), DEFA 552/553 (NATO). The cartridge is used in target practice.

Description:

TARGET PRACTICE Cartridge. The cartridge has a blue painted projectile with white markings. The inert/solid projectile is a three piece assembly consisting of steel body with cavity, rotating band, and aluminum nose piece. The cartridge case is aluminum.

Function:

The cartridge consists of an inert, solid projectile without a fuse. No function takes place except penetration of target.

Tabulated Data:

DODAC: 1305-B118

STD.

Use:

Automatic cannon, 30mm, M230 (U.S.).

Description:

HIGH EXPLOSIVE DUAL PURPOSE Cartridge. The cartridge consists of a steel projectile body loaded with HMX explosive and spin compensated shaped charge liner, point detonating (PD) bore safe fuze and aluminum cartridge case.

Purpose:

The projectile fuze arms in flight. Upon impact, the fuze initiates the projectile explosive filler. Detonation of the filler charge collapses the shaped charge liner resulting in the formation of an armor-piercing jet. In addition, main charge detonation produces fragmentation of the projectile body resulting in antipersonnel effects in target vicinity.

CARTRIDGE, 30MM, DUMMY, M848

Type Classification:

STD - LCC-A MSR 04826009.

Use:

Automatic cannon, 30mm, M230. The cartridge is used in drills of the weapon mechanism and to test link/delink functions.

Description:

DUMMY Cartridge. The cartridge is completely inert with modified target practice (TP) projectile and cartridge case. Primer and propellant are replaced with threaded steel bolt attached to the base of the projectile body to maintain same weight and balance as the TP cartridge. The projectile body is steel with an aluminum nose.

**Type Classification:**

STD - LCC-A, MSR 06827003.

**Use:**

Automatic cannon, 30mm, M230. The cartridge is used in proof testing the weapon and barrel.

**Description:**

TEST Cartridge. The cartridge is a high pressure test round which provides 120 percent chamber pressure to proof test the weapon and barrel. Case, primer, and propellant are identical to the target practice round. Excess pressure is achieved through a heavier 1018 steel projectile. Ogive is blunt and cartridge case is silvered to distinguish from service rounds.

CHAPTER 17

POINT-DETONATING FUZES
FUZE, POINT-DETONATING: M505A3

Type Classification:

STD.

Use:

The fuze is designed for use with the 20mm high explosive incendiary (HEI) and high explosive incendiary with tracer (HEI-T) cartridges against aircraft and light armor.

Description:

The point-detonating, single-action nose fuze is intended to function upon impact with the target. The fuze is used with the following HEI cartridges: M56A3/A4, M97A2, M210, M242 and M246.

Function:

Upon impact, the fuze initiates the HE filler and disperses the incendiary filler. The fuze arms in flight. Its delay is 10 to 35 feet.

**FUZE, POINT-DETONATING, SELF-DESTROYING: M758**

![Diagram of the M758 fuze]

**Type Classification:**

STD - MSR 12796010.

**Use:**

The fuze is designed for use with the 25mm, high explosive incendiary with tracer, M792 cartridge, fired from the M242 cannon.

**Description:**

The point-detonating (PD), self-destroying (SD) M758 fuze is a delayed arming, PD SD type which also features graze impact sensitivity against hard and soft ground media as well as super-quick functioning upon target impact. The fuze consists of an ogive assembly crimped to a base assembly which houses a piston assembly, a piston spring, a body assembly, and a setback spring. The ogive assembly consists of a nylon probe within a steel ogive crimped to a steel probe cap while the base assembly consists of a lead charge within a steel base. The piston spring separates the piston assembly, consisting of an aluminum piston base, a piston seal, a seal ring, a steel restrictor, and a steel firing pin from the body assembly consisting of a nylon upper body, an aluminum lower body, a steel roller weight, a body, a zinc rotor, a detonator, two steel lockweights and lockweight springs which, in turn, separate from the base assembly by the setback spring.

**Function:**

Starting from the safe condition, acceleration forces, associated with projectile launch, cause the body assembly and piston assembly located within the fuze ogive to be simultaneously set back to the rear of the fuze against the setback spring. Air originally in the bottom of the fuze is forced through ports into the chamber above the piston. The high spin forces, which occur almost simultaneously with the setback forces, serve three purposes. The spin effect causes two lockweights to move against their firing pin which keeps the motor in a safe position. Spin also causes two balls to move outward into groove located around the inner part of the ogive, locking the body assembly rearward against the compressed force of the setback spring. Spin also causes a rubber piston seal to flare out against the bore of the ogive, resulting in necessary piston sealing action. As the projectile leaves the muzzle, the acceleration force dissipates and the piston becomes free to move forward under forces exerted by the piston spring. The rate of piston movement forward is controlled by air being forced through a porous metal restrictor. This action provides the required arming delay time to meet the fuze no-arm and all-arm requirements. As the piston approaches the forward position, the firing pin is withdrawn from the
rotor, allowing it to rotate to the armed position. Centrifugal force acting on the roller weight causes it to move into a groove and lock the rotor in the armed position. The fuze is fully armed when the detonator is in line with the firing pin and lead assembly. The fuze functions under conditions of direct impact, graze impact or self destruct (non-impact). Direct impact with the target causes a super-quick function of the fuze due to the crushing action of the nose probe. The nose probe is driven into the piston assembly, moving it rapidly rearward. The firing pin, as part of the piston assembly, is thereby driven into the detonator and the explosive train is initiated. Function at low graze angles can occur in two ways. On soft targets where the projectile tends to enter the target, the nose probe is crushed driving the piston firing pin into the detonator. On low angle or graze impacts on hard targets, deceleration of the projectile and spin decay occurs. Spin decay reduces the centrifugal forces acting on the self-destruct balls and inertial force acts on the body assembly due to projectile deceleration. This, coupled with the stored energy of the setback spring, overrides the force exerted by the self-destruct balls and the body assembly is driven forward rapidly. The detonator contacts the firing pin and begins initiation of the explosive train. If no contact is made with a target, the fuze will cause the projectile to function by self-destruct action after a predetermined flight time. Projectile spin decay reduces the centrifugal forces acting on the self-destruct balls. The stored energy in the setback spring overrides the holdback force of the balls and forces the body assembly forward to drive the detonator into the firing pin. Initiation of the explosive train occurs, and the projectile is detonated while still in flight.

FUZE, POINT-DETONATING: M759 (XM714E6)

Type Classification:

STD.

Use:

The fuze is designed for use with the 30mm high explosive dual purpose (HEDP) cartridges fired from the M230 automatic cannon.

Description:

Fuze M759 (formally designated as the XM714E6) is a point-detonaing type with detonator and spitback charge. It is used with HEDP cartridge M789.

Function:

Prior to launch, the fuze detonator is housed in the rotor with the rotor locked in the safe position by the firing pin tip and two lockweights. On setback, the piston assembly (with firing pin) and body assembly (with detonator and rotor) are moved to the most rearward position by the firing pin tip and two lockweights. As the fired projectile exits the gun muzzle, spin environment causes the lockweights to retract from the rotor and the two steel balls to engage the ogive groove, locking the body assembly in the position it had achieved at setback. In addition, spin causes the piston seal to flare and engage the ogive sidewalls which eliminates the air flow path between the ogive and piston. Movement of the piston assembly (firing pin) to the forward or armed position is delayed due to the regulated flow of trapped air through the restrictor until the projectile has traveled a minimum of 15 meters from the muzzle. After retraction to the firing pin from the rotor (last safety lock), the spin causes the rotor (with detonator) to rotate to the armed state, i.e., stab detonator aligned with firing pin and lead cup assembly. As the rotor achieves the armed position (150 m), the roller weight moves out-board from the rotor and engages the detent from the lower and upper bodies thus locking the rotor in armed state. Upon target impact, the probe nose piece is driven into the ogive forcing the piston assembly (firing pin) aft. The firing pin stabs the detonator, and its explosive initiates the lead cup assembly explosive which, in turn, ignites the main charge.

CHAPTER 18

ACCESSORIES

GENERAL.

a. Accessories. Accessories used with small arms ammunition, such as clips and metallic belt links, are described in this chapter. These items are listed and packed as indicated in SC 1305/30-IL and also listed in TM 9-1305-201-20&P.

b. Magazines for Pistols and Other Small Arms. Magazines for pistols and other small arms do not come preloaded from the ammunition supply point. The magazine for the submachine gun M3 and M3A1 holds 30 rounds of ammunition and this also is not preloaded.

c. Metallic Link Belts. Ammunition for use in machine guns is issued in metallic link belts. Link belts are made of units of cartridges and links. Each link has two loops fitted around a single cartridge and one loop fitted around an adjacent cartridge. Each cartridge in a metallic link belt has two links attached to it, except the end cartridges. Cartridge links are made of steel which is processed to prevent rusting. They are manufactured and tested to assure satisfactory ammunition feeding and functioning under all service conditions.
ACCESSORIES FOR CARTRIDGES, CALIBER .50

Links, Closed Loop, M2 and M9:

Caliber .50, M2 and M9 links (fig. 18-7) are manufactured with closed loops. When assembled with the cartridge in belts, the links fit on the cartridge shoulder. The tapered front loops of the links are positioned firmly on the cartridge shoulder to hold the cartridge in proper alignment for feeding into the weapon. The design required the cartridge to be extracted from the rear and dropped into position for moving into the chamber for firing. Weapons designed for the links require additional space in the rear of the receiver for retraction. M2 and M9 links are used with the M2 machine gun only.

Link, M2 (NSN 1305-00-096-3181(A640))
Link, M9 (NSN 1305-00-078-8463(A641))

![Caliber .50, M2 and M9 links (closed loop)](image)

Figure 18-7. Caliber .50, M2 and M9 links (closed loop).

Link, Open Loop, M15A2:

The caliber .50, M15A2 link (fig. 18-8) is manufactured with partially open loops and has a positioning finger on one side which snaps into the extractor grooves of the cartridge to retain the cartridge in proper feed alignment. The link design permits a portion of bolt to ride through link loop openings and push the cartridges forward and out of the link into the chamber for firing. The M15A2 link is used with the M85 machine gun.

- SC 1305/30IL
- TM 9-1305-201-20&P

![Caliber .50, M15A2 link (open loop)](image)

Figure 18-8. Caliber .50, M15A2 link (open loop).
ACCESSORIES FOR CARTRIDGES, 5.56MM

Clips:

Cartridges for the 5.56mm M16 rifle are assembled in 10-round clips. The clip (fig. 18-1) consists of a channel-shaped body containing a spring with narrow tabs at each end. After the clip is filled, the tabs are bent at right angles to the extractor rims of the end cartridges to hold them securely in the clip (NSN 1305-00-052-4377).

![Figure 18-1. Cartridge clips and bandoleer for 5.56mm cartridges.](image)

Link M27:

The M27 link (fig. 18-2) is a reduced size of the 7.62mm link M13. The body link fits into the extractor groove on the cartridge case. The U.S. Navy uses the link with the Stoner Machine Gun M63. The U.S. Army designated its use for the M249 Machine Gun. The link is used with M855 Ball Cartridges, M856 Tracer, and M200 Blank only.

Other Accessories:

Filler. Magazine.
Bandoleer, M3 (NSN 1305-00-924-3088).

References:

SC 1305/30IL
TM 9-1305-201-20&P

![Figure 18-2. M27 link for 5.56mm.](image)
ACCESSORIES FOR CARTRIDGES, 7.62MM

Clips:

Cartridges for the 7.62mm M14 rifles are assembled in 5-round clips (fig. 18-3). All cartridges are packed in bandoleers with separate magazine fillers. The clip, which consists of a channel-shaped body containing a spring, facilitates loading of magazines. Loaded clips are fitted into the top of the rifle receiver and the cartridges are pressed into the magazine assembly. A magazine filler, which adapts clips to the magazine, allows individual magazines to be loaded with clipped ammunition. The clip is 2.36 inches long. The 7.62mm ammunition and clip are shown with the M2 bandoleer in figure 18-4 and with the M4 bandoleer in figure 18-5. The M4 bandoleer is for belted ammunition for machine guns (NSN 1305-00-914-7912).

Figure 18-3. Cartridge clip, filler, and magazine assembly for 7.62mm cartridges.

Figure 18-4. M2 bandoleer for 7.62mm cartridges.
The 7.62mm M13 link (fig. 18-6) is manufactured with partially open loops and has a positioning finger on one side which snaps into the extractor grooves of cartridges to retain the cartridge in proper feed alignment. The link design permits a portion of the bolt to ride through the link opening and push cartridges forward and out of the link into the chamber for firing. Weapons using this type link are designed and manufactured with a short receiver, i.e., M60, M73, M219, M240, and M134 machine guns (NSN 1305-00-752-7815).

**Other Accessories:**

- Filler, Magazine.
- Bandoleer, M2 (NSN 1305-00-984-1125).
- Bandoleer, M4 (NSN 1305-00-079-3579).

**References:**

- SC 1305/30IL
- TM 9-1305-201-20&P
ACCESSORIES FOR CARTRIDGES, 20MM

Link M10:

The M10 link (fig. 18-9) is utilized in the M3 and M24 belt-fed automatic guns. The link is of steel and the belt is formed by the placement of cartridges within the links. The link is self-separating when the cartridges are removed during the gun feeding cycle. The metallic link can be used to make up belts for either right-hand or left-hand feeding of the gun. A cartridge metallic-link filler is used at the end of the belt when it is desired to load belts for either double-loop left-hand feed or double-loop right-hand feed. The purpose of the link-filler is to close the single loop when it is at the end of the belt to prevent snagging in the feed chute (NSN 1305-00-028-4869).

![Figure 18-9. M10 link for 20mm cartridges.](image)

Link M12:

The M12 metallic link (fig. 18-10) is used in belt-fed gas-operated M39 series automatic aircraft guns. The ammunition belt is formed by connecting a specified number of links together and then inserting a cartridge for each link. The link is self-separating when cartridges are removed during the gun-feeding cycle. The M12 is an end loading link and is linked for either the right-hand or left-hand feeder (NSN 1305-00-541-0021).

![Figure 18-10. M12 link for 20mm cartridges.](image)
Link M14A2:

The M14A2 link (fig. 18-11) is used primarily for linking 20mm ammunition for belt-fed M61 automatic guns and loading of ammunition into linkless feed systems used in aircraft and ground defense vehicles. The link is self-separating when cartridges are removed during the feeding cycle (NSN 1305-00-935-9219).

Figure 18-11. M14A2 link for 20mm cartridges.

Link M17A2:

The M17A2 link (fig. 18-12) is used for linking 20mm ammunition for belt-fed M61 automatic weapon system in the B52 G & H aircraft. The link is self-separating when the cartridge is removed from the link during the feeding cycle.

Figure 18-12. M17A2 link for 20mm cartridges.
Link M24 and M22:

The M24 link (fig. 18-13) is a metallic link for use with the following 20mm cartridges: M206A1 Target-Practice, M599 High-Explosive Incendiary Tracer, and M601 Armor-Piercing Incendiary Tracer. The European (German) DMI/DMIA link is also used for these cartridges. The DMI/DMIA link is used with the HSH20 series. The M22 link is for U.S. Air Force use only. It is used to upload their linkless system. It is reusable and does not disintegrate.

Link. M22 (NSN 1305-00-926-1939).

Figure 18-13. M24 link.
ACCESSORIES FOR CARTRIDGES, 25MM

Link M28:

The M28 link (fig. 18-14) is a two piece assembly intended to hold and link the 25mm ammunition for guiding the ammunition through the weapon system. The assembly consists of hardened steel main and pivot links hooked together and contoured accordingly for its intended purpose. The Swiss Oerlikon link and the M28 are dimensionally identical.

Figure 18-14. M28 link for 25mm cartridges.
ACCESSORIES FOR CARTRIDGES, 30MM

Link M29:

The M29 link (fig. 18-15) is 1050 steel with type Z (link) phosphate coating. It is used for interoperability with the NATO ADEN/DEFA weapon systems (NSN 1305-01-078-5505).

Figure 18-15. M29 link.
